

WE'RE HIRING

Diagnostics & Screening Coordinator

Build Relationships and Help Deliver
Team-Based, Personalized Care

At the heart of Harrison's on-site laboratory is the dedicated team of Medical Lab Assistants, or Diagnostics & Screening Coordinators. This team creates a well-functioning lab that provides an efficient, familiar, and compassionate experience. We offer a reassuring presence to clients, particularly for those who require regular lab work and other comprehensive testing.

WHAT YOU'LL DO:

The lab plays an integral role in providing excellent client service, attention to detail, and clinical team support.

- Collect specimens such as blood, urine, and biological samples using appropriate collection methods and equipment
- Perform tests and diagnostics including phlebotomy, urine, 12 lead ECG, spirometry, audiometry, 24 Hours ABPM (ambulatory blood pressure), holter monitors, IOP (intraocular pressure), visual field, visual acuity, tonometry, and genetics testing
- Prepare and process specimens for laboratory analysis, including centrifugation
- Maintain laboratory equipment; clean and calibrate.
- Manage lab supply ordering and inventory
- Maintain accurate records and communicate with fellow clinical professionals such as physicians, nurses, or other laboratory personnel to ensure that results meet the needs of the client

QUALIFICATIONS, EDUCATION AND EXPERIENCE:

- Medical Laboratory Assistant credential from an accredited school
- Experience completing blood draws, performing ECGs, and following lab protocols and requisitions
- Excellent interpersonal, written and oral communication skills
- Proven talent to effectively prioritize workflow and multi-task
- At least one year client-facing experience in a lab

MEMBERS OF THE HARRISON TEAM ALWAYS:

- Seek out ways to demonstrate our core values of compassion, innovation and excellence
- Display enthusiasm for delivering personalized care
- Navigate and adapt to clinical challenges
- Foster a forward-thinking approach to healthcare and help drive innovation in the organization
- Lean in to learning and willing to use a variety of technologies
